seanandgibson@gmail.com | 417.343.5392 | San Francisco, CA

Technical Skills

Strong: JavaScript, Node.js/Express, React, Redux, MongoDB, Git
Experienced: C++, C#, Data Structures, jQuery, AngularJS, SQL, Mocha, Chai, Gulp, Webpack, Socket.io

Recent Projects

Chutte | Scrum Master and Software Engineer | chutte.com
A reverse auction web application for selling rare, one-of-a-kind, luxury items
- Architected the single page app with React and employed Redux to manage the app's state
- Integrated Socket.io on front-end to receive real-time updates from the server
- Led daily stand-up meetings and set up Git workflow as Scrum Master

Tinnr | Software Engineer | tinnr.com
A "Tinder-style" web application that enables users to search and save recipes
- Architected back-end infrastructure with Node.js/Express, MongoDB, and REST API
- Integrated Yummly Recipe API to filter recipes on cuisine, diet, or course
- Wrote server side testing with Mocha/Chai

Reserver Space | Software Engineer and Product Owner | reserver.space
A web application for roommates and co-workers to reserve common areas
- Led team in redesigning legacy UI
- Added multiple server routes and functionality to existing Node.js/Express server
- Integrated SendGrid API to programmatically send email notifications to users

RE-Linked | Software Engineer
A social network web application for commercial real estate professionals
- Architected a Node.js/Express server
- Built front-end with AngularJS

Experience

Union Bank | Sr Asset Manager, AVP | Walnut Creek, CA | 2013
- Oversaw a portfolio of Low Income Housing Tax Credit investments
